ShopWave Commerce API Reference

Version 2.3 of the ShopWave REST API lets you manage customers, orders and the product catalogue.

Base URL

All requests are made to `https://api.shopwave.io/v2`. Request and response bodies use JSON.

Authentication

Authenticate every request with a Bearer token in the `Authorization` header: `Authorization: Bearer <access_token>`. Requests without a valid token are rejected with `401 Unauthorized`.

Customers

List customers

`GET /customers`

Returns a paginated list of customers, sorted by creation date with the most recently created customers first.

Query parameters:

Parameter	Type	Required	Description
limit	integer	No	Maximum number of customers to return (1-100). Defaults to 20.
cursor	string	No	Cursor from a previous response used to fetch the next page.
email	string	No	Filter customers by exact email address.

Response 200 OK:

```
{
  "data": [
    {
      "id": "6f1c2a9e-3b7d-4c55-9a51-0d2f4b8e7a10",
      "email": "ada@example.com",
      "full_name": "Ada Lovelace",
      "phone": "+441632960961",
      "marketing_opt_in": false,
      "created_at": "2026-01-14T09:30:00Z"
    }
  ],
  "has_more": true,
  "next_cursor": "c_8a7b6c"
}
```

Create a customer

`POST /customers`

Creates a new customer. The email address must be unique within your account.

Request body:

Field	Type	Required	Description
email	string	Yes	Unique email address of the customer.
full_name	string	Yes	Customer's full name.
phone	string	Yes	Phone number in E.164 format.
marketingOptIn	boolean	No	Whether the customer agreed to receive marketing emails.

Response 200 OK:

```
{
  "id": "6f1c2a9e-3b7d-4c55-9a51-0d2f4b8e7a10",
  "email": "ada@example.com",
  "full_name": "Ada Lovelace",
```

```
  "phone": "+441632960961",
  "marketing_opt_in": false,
  "created_at": "2026-01-14T09:30:00Z"
}
```

Error codes:

Status	Description
400	The request body failed validation.

Retrieve a customer

`GET /customers/{customer_id}`

Retrieves the details of an existing customer using the customer's unique identifier.

Path parameters:

Parameter	Type	Required	Description
customer_id	integer	Yes	Unique identifier of the customer.

Response 200 OK:

```
{
  "id": "6f1c2a9e-3b7d-4c55-9a51-0d2f4b8e7a10",
  "email": "ada@example.com",
  "full_name": "Ada Lovelace",
  "phone": "+441632960961",
  "marketing_opt_in": false,
  "created_at": "2026-01-14T09:30:00Z"
}
```

Returns `404 Not Found` if no customer exists with the given identifier.

Delete a customer

`DELETE /customers/{customer_id}`

Status codes:

Status	Description
204	The customer was deleted.
404	The customer does not exist.

Get customer rewards

`GET /customers/{customer_id}/rewards`

Returns the loyalty points balance and reward tier of a customer.

```
{
  "points": 1200,
  "tier": "gold"
}
```

Orders

List orders

`GET /orders`

Returns a paginated list of orders. You can filter orders by status, customer and creation date.

Query parameters:

Parameter	Type	Required	Description
limit	string	No	Maximum number of orders to return. Defaults to 20.
cursor	string	No	Cursor for the next page.

Parameter	Type	Required	Description
status	string	No	Only return orders with this fulfilment status.
customer	string	No	Only return orders placed by this customer.
created_after	string	No	Only return orders created after this ISO 8601 timestamp.

Response 200 OK:

```
{
  "data": [
    {
      "id": "a3e9b0c4-1d2f-4e6a-8b7c-9d0e1f2a3b4c",
      "status": "paid",
      "customer_id": "6f1c2a9e-3b7d-4c55-9a51-0d2f4b8e7a10",
      "items": [{"product_id": "prod_1001", "quantity": 2, "unit_price": 19.99}],
      "total_amount": 39.98,
      "currency": "EUR",
      "created_at": "2026-02-01T12:00:00Z"
    }
  ],
  "has_more": false
}
```

Create an order

`POST /orders`

Creates a new order for a customer. Stock is reserved for every line item until the order is paid or cancelled.

Headers:

Header	Type	Required	Description
Idempotency-Key	string	No	Unique key that makes retried requests safe.

Request body:

```
{
  "customer_id": "6f1c2a9e-3b7d-4c55-9a51-0d2f4b8e7a10",
  "items": [{"product_id": "prod_1001", "quantity": 2}],
  "shipping_address": {
    "line1": "1 Market Street",
    "city": "Dublin",
    "postal_code": "D02 XY45",
    "country": "IE"
  },
  "notes": "Leave at reception"
}
```

Response 201 Created: returns the created order object.

Possible errors: `400 Bad Request` when validation fails and `422 Unprocessable Entity` when a product is out of stock.

Retrieve an order

`GET /orders/{order_id}`

Retrieves a single order together with its line items and shipping address.

Parameters:

Parameter	In	Type	Required	Description
order_id	path	string	Yes	Unique identifier of the order.
include	header	string	No	Comma-separated list of related objects to expand, such as customer.

Response 200 OK:

```
{
  "id": "a3e9b0c4-1d2f-4e6a-8b7c-9d0e1f2a3b4c",
```

```
  "status": "shipped",
  "customer_id": "6f1c2a9e-3b7d-4c55-9a51-0d2f4b8e7a10",
  "items": [{"product_id": "prod_1001", "quantity": 2, "unit_price": 19.99}],
  "total": 39.98,
  "currency": "EUR",
  "shipping_address": {
    "line1": "1 Market Street",
    "city": "Dublin",
    "postal_code": "D02 XY45",
    "country": "IE"
  },
  "created_at": "2026-02-01T12:00:00Z"
}
```

Cancel an order

`POST /orders/{order_id}/cancel`

Archives the order so that it is hidden from the default order list in the merchant dashboard.

Request body:

- `reason` (string, optional): Free-text reason for the cancellation.

Response 200 OK: returns the updated order object. Returns `404 Not Found` if the order does not exist.

Products

Retrieve a product

`GET /v1/products/{product_id}`

Retrieves a product from the catalogue, including its current price and the quantity in stock. This endpoint is public and does not require authentication.

Response 200 OK:

```
{
  "id": "prod_1001",
  "name": "Ceramic Mug",
  "price": 19.99,
  "currency": "EUR",
  "stock": 140,
  "active": true
}
```
